Quiz: Dilations and Similarity

Under a dilation, triangle $P(0, 0)$, $Q(3, 5)$, $R(1, 2)$ becomes triangle $P'(0, 0)$, $Q'(6, 10)$, $R'(2, 4)$. What is the scale factor for this dilation?

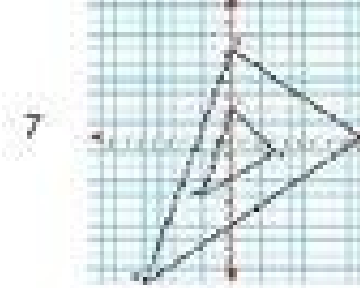

The graph below shows an example of a transformation. Which transformation is shown?

Under a dilation of scale factor 4 with the center at the origin, what will be the coordinates of the image of point Q ?

What is the scale factor of the dilation (with center at the origin) shown below?

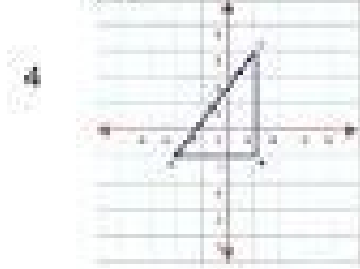

Under a dilation of scale factor 3 with the center at the origin, what will be the coordinates of the image of point P ?

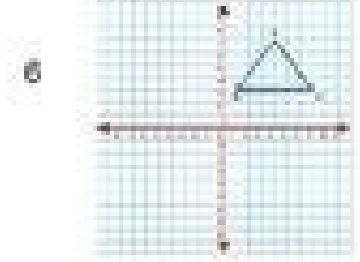

Rectangle $P(1, 2)$, $Q(2, 2)$, $R(2, 0)$, $S(1, 0)$ is similar to rectangle $P'Q'R'S'$. If $RQ = 3$, graph a dilation (center origin) of rectangle $ABCD$ showing both rectangles and state the scale factor.

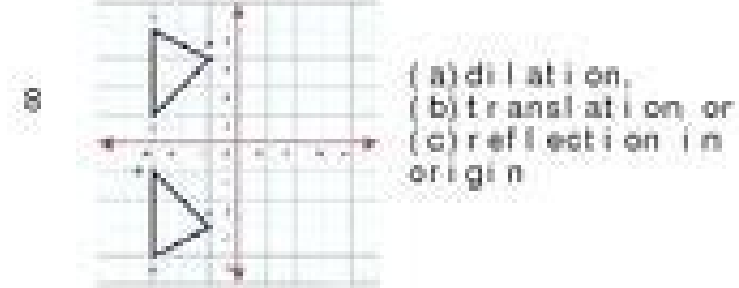

What are the coordinates of the image of point R under a dilation with center at the origin of scale factor 2?

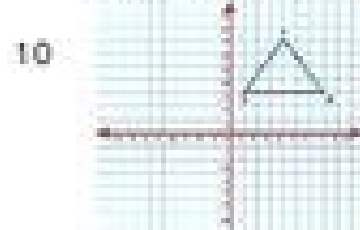

What are the coordinates of the image of point R under a dilation with center at the origin of scale factor 2?

The graph at the left shows an example of a transformation. Which transformation is shown?

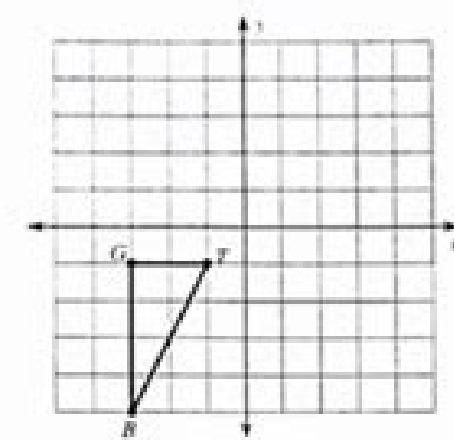

Under a dilation of scale factor 2 with the center at the origin, what will be the coordinates of the image of point Q ?

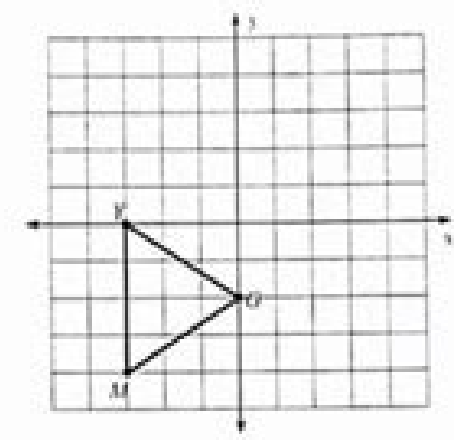

Translations

Graph the image of the figure using the transformation given.

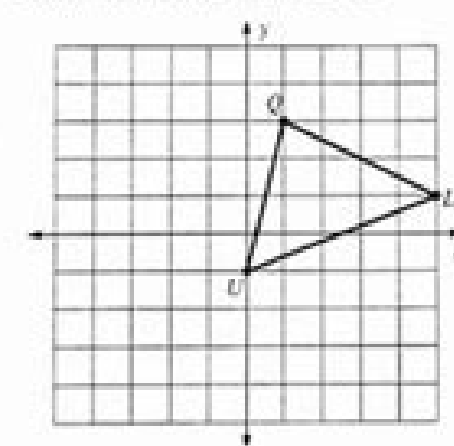

1) translation: 5 units right and 1 unit up

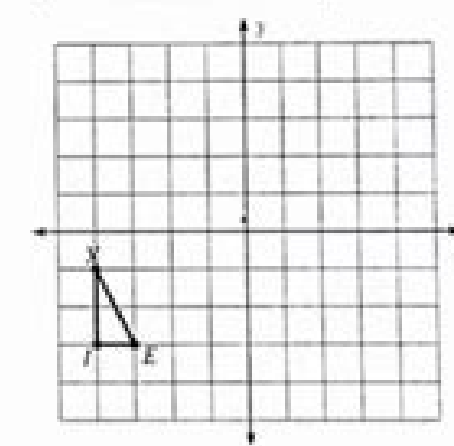

2) translation: 1 unit left and 2 units up

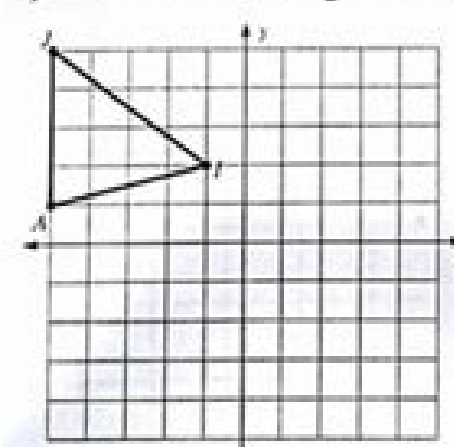

3) translation: 3 units down

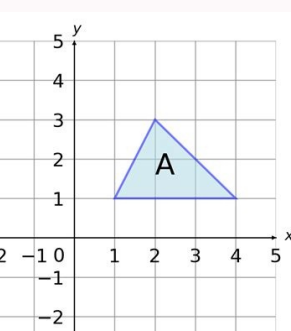

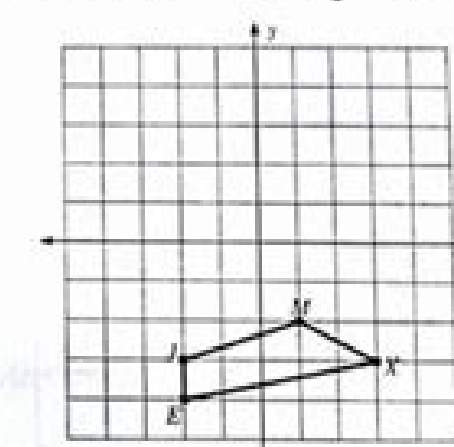

4) translation: 5 units right and 2 units up

5) translation: 4 units right and 4 units down

6) translation: 2 units right and 3 units up

Directions: Show the image of the figure under the given transformation.

1) Translate the figure 3 units up.

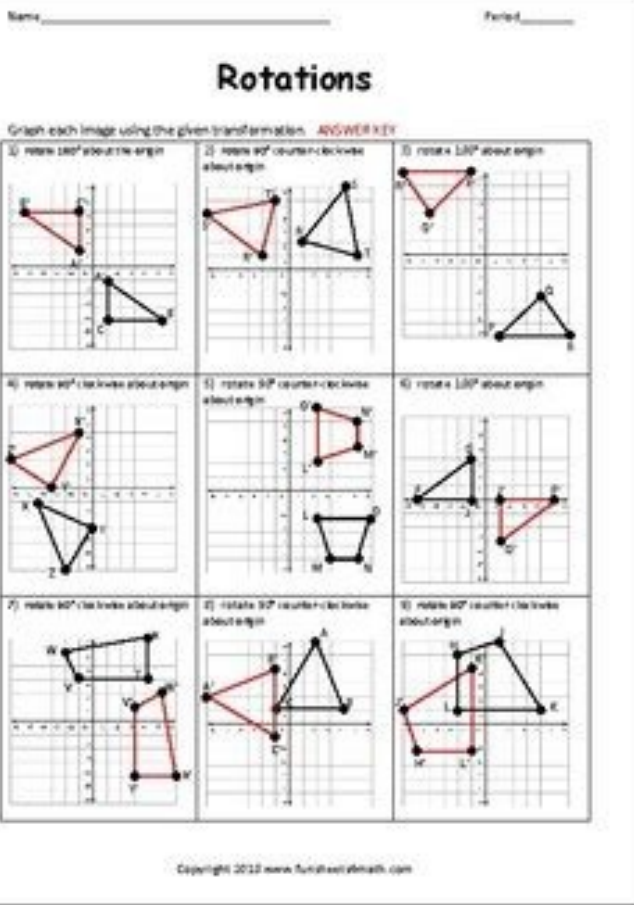

2) Translate the figure 2 units right.

3) Translate the figure 4 units down.

4) Translate the figure 1 unit left.

5) Translate the figure 5 units right.

6) Translate the figure 3 units up.
